ABHAY RAMESH CHASKAR

Software Analyst | +91 9146704996 | <u>Email: Abhay Chaskar</u> | <u>LinkedIn</u> | <u>GitHub</u>

An experienced Frontend Developer with strong discipline, a team-oriented mindset, excellent problem-solving abilities, and great communication skills, who always seeks a challenging role to contribute, collaborate, and deliver exceptional outcomes.

EDUCATION

Bachelor of Engineering in Computer Science, | JSPM, Wagholi   June 2021, CGPA: 8.3

- Volunteered for the Gamer's Creed event in 2018, participated in the Coding Ninja event, and presented in a poster competition.
- Passionate about continuous learning, innovation and community engagement.

EXPERIENCE

Custom Software Engineering Analyst | Accenture | Bengaluru, Karnataka   Nov 2024 – Present

- Developed interactive user interfaces using component-based architecture for flexibility.
- Innovated UIs using Gen AI and created interactive prototypes based on complex user prompts.
- Conducted code reviews, troubleshooting and debugging issues for sustainable web applications.
- Enhanced load times by 30%, delivered a reliable product with required features, and maintained a 90% client retention rate through effective coordination with cross-functional teams.

Systems Engineer | Infosys | Pune, Maharashtra   Mar 2022 – Oct 2024

- Designed and developed SPAs by translating design wireframes into high quality code.
- Used protected routes, throttling, and debouncing events to enhance web performance and security.
- Integrated APIs and handled promises using asynchronous code.
- Implemented error handling with HOCs like ErrorBoundary and improved web performance by deferring the loading of components using lazy and suspense.
- Built an executable application using Electron Builder.
- Followed Agile methodologies for the seamless delivery of applications.
- Improved security for authenticated users and increased web performance by 30%.

Trainee | Neosoft Tech. | Pune, Maharashtra   Jul 2021 – Mar 2022

- Received training in frontend technologies, worked and collaborated with the team on a training project.
- Designed Pizza delivery app using MERN stack.
- Tested Rest APIs on Postman.
- Used a variety of libraries to design webpages like CSS, Bootstrap, and MUI.
- Managed code using the Git version control tool.

PROJECTS

- My portfolio | **Repo**

  Designed simple but an interactive portfolio in Next.js using React.js and Tailwind CSS, highlighting my expertise in frontend domain by prioritizing performance, responsiveness, and intuitive navigation.

- Weardo Store | **Repo**

  Developed a modern, responsive e-commerce site allowing users to manage their shopping carts using MERN stack with Stripe, reflecting my skills in building scalable solutions with emphasized seamless design, efficient code structure, and a customer focused approach.

- Admin Dashboard | **Repo**

  Built a dynamic and responsive admin panel using React.js and Bootstrap, enabling real-time data management and visualization, user control and system monitoring with ease of navigation.

- LikhteJao Blog (in development) | **Repo**

  Crafted a full stack blogging app in Next.js using React.js, Prisma, and PostgreSQL. Implemented features in a responsive and user-friendly interface, allowing users to publish, edit, manage and view the latest blogs.

SKILLS

React.js, Next.js, HTML, CSS, JavaScript, TypeScript, ES6, JSX, Tailwind CSS, Bootstrap, JSON, RestAPI, SFCC, Python, SQL, Docker, Git, Jira

TOOLS

VS Code, Figma, Chrome DevTools, Postman, GitHub, NPM, Gulp/Grunt, Webpack

EXPERTISE

- Page Optimization
- UI Enhancement
- Code Refactoring
- Streamline delivery
